The New Rules of Lifting for Women Lou Schuler, Cassandra Forsythe, PhD, RD, Alwyn Cosgrove, 2008-12-26 In The New Rules of Lifting for Women, authors Lou Schuler, Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength, conditioning and nutrition plan destined to revolutionize the way women work out. All the latest studies prove that

strength training, not aerobics, provides the key to losing fat and building a fit, strong body. This book refutes the misconception that women will bulk up if they lift heavy weights. Nonsense! It's tough enough for men to pack on muscle, and they have much more of the hormone necessary to build muscle: natural testosterone. Muscles need to be strengthened to achieve a lean, healthy look. Properly conditioned muscles increase metabolism and promote weight loss -- it's that simple. The program demands that women put down the Barbie weights, step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman. The New Rules of Lifting for Women will change the way women see fitness, nutrition and their own bodies.

Tactical Barbell K. Black, 2016-09-18 Operational athletes are a unique breed. You need to physically perform at an extraordinarily high level in stressful situations. Often in dangerous or unstable environments. As a SWAT operator, combat-arms soldier, or first responder, you have to be a Jack of All Trades. Let's take that a step further. You have to achieve some degree of mastery. You have to be strong, have incredible levels of endurance, and be capable of sustained bursts of intense activity. All while tired, hungry, cold, or worse. You can't train like a bodybuilder. You can't be sore for a week after 'leg' day. You can't afford to specialize like a powerlifter. You have other abilities you need to develop, things like cardiovascular training, work capacity, and occupational skills. Anyone that's operational knows it's a constant juggling act trying to become (and stay) superhuman. Tactical Barbell is a strength training program designed specifically for operational athletes using correct principles and best practices. The objective being to increase maximal-strength and strength-endurance, while taking into account the need to simultaneously train other fitness domains. Periodization based, with a simple progression model that allows for a great degree of customization. You won't find cables, balance boards or medicine balls in this program. What you will get is a reliable, repeatable, cutting edge system to increase your strength dramatically. In a manner that leaves you time and energy to train all those other things you need to be good at. No fluff. No frills. If you live in the arena, you know talk is cheap. The program includes a built in strength testing component. You will know whether or not your strength has increased, and by how much. Simple.
