**ECEL2015-14th European Conference on e-Learning**, Amanda Jefferies and Marija Cubric ,2015-10-13 These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on Innovating for learning: designing for the future of education. On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of Mobile Learning - No Longer Just e-Learning with Mobiles. ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers, 16 PhD Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Coventry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning [www.ejel.org](http://www.ejel.org) ).

**Handbook of Research on Mobile Devices and Applications in Higher Education Settings** Briz-Ponce, Laura, Juanes-Méndez, Juan Antonio, García-Peñalvo, Francisco José, 2016-07-13 Mobile phones have become an integral part of society, as their convenience has helped democratize and revolutionize communication and the marketplace of ideas. Because of their ubiquity in higher education, undergraduate classrooms have begun to utilize smartphones and tablets as tools for learning. The Handbook of Research on Mobile Devices and Applications in Higher Education Settings explores and fosters new perspectives on the use of mobile applications in a classroom context. This timely publication will demonstrate the challenges that universities face when introducing new technologies to students and instructors, as well as the rewards of doing so in a thoughtful manner. This book is meant to present the latest research and become a source of inspiration for educators, administrators, researchers, app developers, and students of education and technology.

Mobile Learning Maria Uther, 2019-03-25 Mobile learning has become one of the more influential aspects of the field of educational technology, given the ubiquity of modern mobile devices and proliferation of educational applications or 'apps'. Within this volume, there are a range of studies and reviews which cover a breadth of current topics in the field, namely user motivations for using mobile learning, issues in evaluation, as well as domain-specific considerations (e.g., use within language learning or audio-based applications). Together, these studies represent the synthesis of a range of methods, approaches, and applications that highlight benefits and areas of future growth of mobile technologies and how they can be useful and most effective in education.

*Assistive Technologies- E-Book* Albert M. Cook, Janice Miller Polgar, Pedro Encarnação, 2019-11-08 Master the assistive strategies you need to make confident clinical decisions and help improve the quality of life for people with disabilities. Based on the Human Activity Assistive Technology (HAAT) model developed by Al Cook, Sue Hussey and Jan Polgar, *Assistive Technologies: Principles & Practice*, 5th Edition, provides detailed coverage of the broad range of devices, services, and practices that comprise assistive technology. This new text offers a systematic process for ensuring the effective application of assistive technologies — and focuses on the relationship between the human user and the assisted activity within specific contexts. It features over 30 new photos and illustrations, as well as, updated chapters and case studies that reflect current technology. Human Activity Assistive Technology (HAAT) framework locates assistive technology within common, everyday contexts for more relevant application. Focus on clinical application guides application of concepts to real-world situations. Study questions and chapter summaries in each chapter help assessment of understanding and identification of areas where more study is needed. Coverage of changing AT needs throughout the lifespan emphasizes how AT fits into people's lives and contributes to their full participation in society. Principles and practice of assistive technology provide the foundation for effective reasoning. Ethical issues content provides vital information to guide AT service delivery. Explicit applications of the HAAT model in each of the chapters on specific technologies and more emphasis on the interactions among the elements make content even easier to understand. New! Thoroughly updated chapters to reflect current technology and practice. New! Expanded discussion on assistive robotics and smart technologies. New! Review of global initiatives on Assistive Technology. New! Updated art program with 30+ new photos and illustrations. New! Updated case studies to reflect changes in technology and practice since last edition.

Supporting Young Learners in Speaking English Andreas Kullick, 2024 How can technology-enhanced tasks be used to support oral communication in heterogeneous English as a Foreign Language (EFL) primary classrooms? This study explores pre-service and in-service teachers' cognitions on the use of technology-enhanced foreign language learning tasks in the young learners' classroom. The study investigates the aspects of technology-enhanced tasks that participants consider as having a relevant impact on the development of learners' oral communicative competence, the criteria participants consider relevant for the design of such tasks in ways that cater for the needs of heterogeneous groups, and the support participants consider helpful in order to create and implement such tasks. Data were collected by carrying out three small-scale technology-enhanced projects in EFL primary school classrooms in the German federal state of Baden-Württemberg. The findings suggest that technology-enhanced tasks are well suited to supporting heterogeneous groups of primary school children in speaking English. Andreas Kullick has taught at primary and secondary schools and has also worked as a teacher trainer in English language teaching. He holds a PhD from the University of Education in Schwäbisch Gmünd and has been a

Senior Lecturer in English Language Teaching at the University of Augsburg since February 2024.

*EASYUNI Ultimate University Guide 2014* EasyUni Sdn Bhd, 2014-07-02 Hi there! It's nice to present you once again with another 'hot' issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni's existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia's most popular education portals, committed to helping students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and "study abroad" consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn't it? The issue you're holding now has so much to offer as well. So, read every page and fill yourself with all the knowledge needed to make informed decisions about your higher education.

**The Child Protection Practice Manual** Caroline Fertleman, Gayle Hann, 2016 This book equips professionals with the ability to recognise a child at risk and to work with a child already suffering. Advice is offered on how to navigate the multi-disciplinary processes. Fictional case studies and exercises immerse the reader in scenarios. The authors lead readers through learning points, recommendations, and legislation.

**Open Source Technology: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2014-11-30 The pervasiveness of and universal access to modern Information and Communication Technologies has enabled a popular new paradigm in the dissemination of information, art, and ideas. Now, instead of relying on a finite number of content providers to control the flow of information, users can generate and disseminate their own content for a wider audience. Open Source Technology: Concepts, Methodologies, Tools, and Applications investigates examples and methodologies in user-generated and freely-accessible content available through electronic and online media. With applications in education, government, entertainment, and more, the technologies explored in these volumes will provide a comprehensive reference for web designers, software developers, and practitioners in a wide variety of fields and disciplines.
