Teaching about the Holocaust in English Secondary Schools Alice Pettigrew, University of London. Institute of Education. Department of Arts and Humanities, 2009 The ground-breaking report *Teaching About the Holocaust in English Secondary Schools: An empirical study of national trends, perspectives and practice* explores when, where, how and why the Holocaust is taught in state-maintained secondary schools in England. The challenges and issues identified have been used to design and develop the world's first research-informed programme of teacher professional development in Holocaust education. The landmark national research that underpins this report employed a two-phase mixed methodology. This comprised an online survey which was completed by more than 2,000 respondents and follow-up interviews with 68 teachers in 24 different schools throughout England. The report is the largest endeavour of its kind in the United Kingdom in both scope and scale. The authors hope it will be of considerable value to all those concerned with the advancement and understanding of Holocaust education both in the UK and internationally.

As the Witnesses Fall Silent: 21st Century Holocaust Education in Curriculum, Policy and Practice Zehavit Gross, E. Doyle Stevick, 2015-03-16 This volume represents the most comprehensive collection ever produced of empirical research on Holocaust education around the world. It comes at a critical time, as the world observes the 70th anniversary of the liberation of Auschwitz. We are now at a turning point, as the generations that witnessed and survived the Shoah are slowly passing on. Governments are charged with ensuring that this defining event of the 20th century takes its rightful place in the schooling and the historical consciousness of their peoples. The policies and practices of Holocaust education around the world are as diverse as the countries that grapple with its history and its meaning. Educators around the globe struggle to reconcile national histories and memories with the international realities of the Holocaust and its implications for the present. These efforts take place at a time when scholarship about the Holocaust itself has made great strides. In this book, these issues are framed by some of the leading voices in the field, including Elie Wiesel and Yehuda Bauer, and then explored by many distinguished scholars who represent a wide range of expertise. Holocaust education is of such significance, so rich

in meaning, so powerful in content, and so diverse in practice that the need for extensive, high-quality empirical research is critical. This book provides exactly that.

The International status of education about the Holocaust Carrier, Peter, Fuchs, Eckhardt, Messinger, Torben, Georg Eckert Institute for International Textbook Research (Germany), 2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.
