George C. Galster

Wide Neighborhoods Mary Breckinridge, 2021-05-14 *Wide Neighborhoods* is the autobiography of Mary Breckinridge, the remarkable founder of the Frontier Nursing Service. It is equally the story of the unique organization she founded in the mountains of Eastern Kentucky in 1925—the Frontier Nursing Service. Riding out on horseback, the FNS nurse-midwives, the first of their profession in this country, proved that high mortality rates and malnutrition need not be the norm in remote rural areas. The FNS, through its example and through the graduates of its school of midwifery and family nursing, has exerted a lasting influence on family health care throughout the world.

Planning with Neighborhoods William M. Rohe, Lauren B. Gates, 2017-10-01 Neighborhood planning programs involve citizens in developing plans and self-help projects for their neighborhoods through local organizations. They also assist residents in reviewing projects developed by city agencies. Based on a survey of fifty-one neighborhood planning programs and in-depth case studies of Atlanta, Cincinnati, Houston, St. Paul, Wilmington, N.C., and Raleigh, *Planning with Neighborhoods* offers the first comprehensive description and evaluation of the effectiveness of these programs. Moving beyond theory, this study reviews the actual accomplishments and limitations of neighborhood planning programs and offers specific recommendations for designing a successful program. Included are a thorough history of neighborhood planning programs and an examination of the social, political, and planning theories that support their existence. Eight propositions on the benefits of a neighborhood-based approach to planning are derived from this theory and evaluated on the basis of actual experience with this type of program. Speaking to both academics interested in neighborhood issues and planning practitioners, *Planning with Neighborhoods* concludes with recommendations for establishing effective neighborhood planning programs and improving existing programs. Sustainable Urbanism Douglas Farr,2007-11-16 Written by the chair of the LEED-Neighborhood Development (LEED-ND) initiative, *Sustainable Urbanism: Urban Design with Nature* is both an urgent call to action and a comprehensive introduction to sustainable urbanism--the emerging and growing design reform movement that combines the creation and enhancement of walkable and diverse places with the need to build high-performance infrastructure and buildings. Providing a historic perspective on the standards and regulations that got us to where we are today in terms of urban lifestyle and attempts at reform, Douglas Farr makes a powerful case for sustainable urbanism, showing where we went wrong, and where we need to go. He then explains how to implement sustainable urbanism through leadership and communication in cities, communities, and neighborhoods. Essays written by Farr and others delve into such issues as: Increasing sustainability through density. Integrating transportation and land use. Creating sustainable neighborhoods, including housing, car-free areas, locally-owned stores, walkable neighborhoods, and universal accessibility. The health and environmental benefits of linking humans to nature, including walk-to open spaces, neighborhood stormwater systems and waste treatment, and food production. High performance buildings and district energy systems. Enriching the argument are in-depth case studies in sustainable urbanism, from BedZED in London, England and Newington in Sydney, Australia, to New Railroad Square in Santa Rosa, California and Dongtan, Shanghai, China. An epilogue looks to the future of sustainable urbanism over the next 200 years. At once solidly researched and passionately argued, *Sustainable Urbanism* is the ideal guidebook for urban designers, planners, and architects who are eager to make a positive impact on our--and our descendants'--buildings, cities, and lives.

Private Neighborhoods and the Transformation of Local Government Robert Henry Nelson,2005 From 1980 to 2000, half the new housing in the United States was built in a development project governed by a neighborhood association. More than 50 million Americans now live in these associations. In *Private Neighborhoods and the Transformation of Local Government*, Robert Nelson reviews the history of neighborhood associations, explains their recent explosive growth, and speculates on their future role in American society. Unlike many previous studies, Nelson takes on the whole a positive view. Neighborhood associations are providing the neighborhood environment controls desired by the residents, high quality common services, and a stronger sense of neighborhood community. Identifying significant operating problems, Nelson proposes new options for improving the future governance of neighborhood associations.

Neighborhoods, People, and Community Roger Ahlbrandt,2013-03-09 This book focuses on neighborhoods and the people living in them. It describes differences among neighborhoods in terms of their social and institutional structure, attitudes of the residents, quality of life, and the characteristics of the residents. The book is based on the results of a survey of almost 6,000 residents living throughout the city of Pittsburgh. As such it provides the basis for examining groups of people as well as whole neighborhoods. The communal aspects of urban living are discussed in Chapters 1 and 2; attachment toward the neighborhood in Chapter 3; importance of religion, life cycle, and race in Chapter 4; various aspects of individual social

support systems and neighborhood social fabric in Chapters 5, 6, and 7; the contextual aspects of the neighborhood environment in Chapters 8 and 9; and the implications for urban policy in Chapter 10. The results of the analysis described in the book provide a detailed understanding of differences in the structure and composition of urban neighborhoods, and they show why some groups of people are drawn into their neighborhoods whereas others rely more upon the wider community to meet a variety of needs. The analysis provides the framework in which to address the implications for urban policy, particularly with respect to mental health prevention and neighborhood and community renewal.

Making Our Neighborhoods, Making Our Selves George C. Galster, 2024-01-19 Drawing on economics, sociology, geography, and psychology, Galster delivers a clear-sighted explanation of what neighborhoods are, how they come to be—and what they should be. Urban theorists have tried for decades to define exactly what a neighborhood is. But behind that daunting existential question lies a much murkier problem: never mind how you define them—how do you make neighborhoods productive and fair for their residents? In *Making Our Neighborhoods, Making Our Selves*, George C. Galster delves deep into the question of whether American neighborhoods are as efficient and equitable as they could be—socially, financially, and emotionally—and, if not, what we can do to change that. Galster aims to redefine the relationship between places and people, promoting specific policies that reduce inequalities in housing markets and beyond.
