Occupation in International Law Eliav Lieblich,Eyal Benvenisti,2022-12 The international law of occupation is the body of law, under international humanitarian law, that regulates the actions of states that gain effective control over territory during armed conflict. This body of law seeks to balance between several interests, which are often in tension with one another. Its most fundamental principle is that occupation does not confer sovereignty, and that the powers of the occupant are limited to that of a temporary trustee. What empowers the occupant to maintain public order and safety, including that of its own forces? How are the rights of the absent sovereign protected, as well as the right to self-determination, and the individual rights of the local population? In this new volume of the Elements of International Law series, Eyal Benvenisti and Eliav Lieblich seek to provide an entry point to the topic by elaborating on general principles and key rules. The book explores the tensions and dilemmas which characterize the modern law of occupation, while highlighting, when needed, interpretations which best conform with the law's object and purpose. All in all, this book aims to guide relevant actors - whether states, academics, NGOs, or individuals under occupation - when seeking to assess or to challenge state actions in occupied territories.

John Deere Tractors Holly Bollinger,2004 John Deere's two cylinder tractors helped build a solid foundation for this American institution--not to mention the nation. John Deere Tractors retraces the early history of the company and its production of these popular models. Far from a simple listing, however, the book is about how the tractors fit into the larger drama of a company, a nation, and a world undergoing tremendous change from 1918 to 1960. From the Waterloo Boy to the 30 Series, each model is described in its historical context includes information such as production numbers and specifications, and is placed in a unique, artful timeline.
