## **The Cognitive-Theoretic Model of the Universe: A New Kind of Reality Theory** Christopher Michael

Langan, 2002-06-01 Paperback version of the 2002 paper published in the journal Progress in Information, Complexity, and Design (PCID). ABSTRACT Inasmuch as science is observational or perceptual in nature, the goal of providing a scientific model and mechanism for the evolution of complex systems ultimately requires a supporting theory of reality of which perception itself is the model (or theory-to-universe mapping). Where information is the abstract currency of perception, such a theory must incorporate the theory of information while extending the information concept to incorporate reflexive self-processing in order to achieve an intrinsic (self-contained) description of reality. This extension is associated with a limiting formulation of model theory identifying mental and physical reality, resulting in a reflexively self-generating, self-modeling theory of reality identical to its universe on the syntactic level. By the nature of its derivation, this theory, the Cognitive Theoretic Model of the Universe or CTMU, can be regarded as a supertautological reality-theoretic extension of logic. Uniting the theory of reality with an advanced form of computational language theory, the CTMU describes reality as a Self Configuring Self-Processing Language or SCSPL, a reflexive intrinsic language characterized not only by self-reference and recursive self-definition, but full self-configuration and self-execution (reflexive read-write functionality). SCSPL reality embodies a dual-aspect monism consisting of infocognition, self-transducing information residing in self-recognizing SCSPL elements called syntactic operators. The CTMU identifies itself with the structure of these operators and thus with the distributive syntax of its self-modeling SCSPL universe, including the reflexive grammar by which the universe refines itself from unbound teleosis or UBT, a primordial realm of infocognitive potential free of informational constraint. Under the guidance of a limiting (intrinsic) form of anthropic principle called the Telic Principle, SCSPL evolves by telic recursion, jointly configuring syntax and state while maximizing a generalized self-selection parameter and adjusting on the fly to freely-changing internal conditions. SCSPL relates space, time and object by means of conspansive duality and conspansion, an SCSPL-grammatical process featuring an alternation between dual phases of existence associated with design and actualization and related to the familiar wave-particle duality of quantum mechanics. By distributing the design phase of reality over the actualization phase, conspansive spacetime also provides a distributed mechanism for Intelligent Design, adjoining to the restrictive principle of natural selection a basic means of generating information and complexity. Addressing

physical evolution on not only the biological but cosmic level, the CTMU addresses the most evident deficiencies and paradoxes associated with conventional discrete and continuum models of reality, including temporal directionality and accelerating cosmic expansion, while preserving virtually all of the major benefits of current scientific and mathematical paradigms.

*The Wondrous Journals of Dr. Wendell Wellington Wiggins* Lesley M. M. Blume,2012-08-07 The journals of Dr. Wendell Wellington Wiggins might just be the most extraordinary contribution to the study of the earth's past since the discovery of the Rosetta Stone. In the incredible pages of these thought-to-be-lost diaries, Dr. Wiggins—whom we now must consider the greatest paleozoologist of all time—has divulged the secrets of the truly ancient animal world: a world before human beings; a world before dinosaurs; a world that, until now, existed well beyond the outer reaches of human imagination. From deadly Amazonian Whispering Vines (*Vitus Sussurus*) to curious creatures called Brittle Bones (*Futilis Osis*) to a mysterious pet named Gibear (*Chiroptera Vicugna Pacosis*), the discoveries of Dr. Wiggins will forever change the way we think about the world before us.

**Coping** Luc Bovens,2021-12-02 Coping is a collection of philosophical essays on how we deal with life's challenges. We hope for better times, but what is hope, and is it a good thing to hope? How do we look back and make sense of our lives in the face of death? What is the nature of love, and how do we deal with its hardships? What makes for a genuine apology, and is there too much or too little apologizing in this world? Can we bring about changes in ourselves to adapt to our circumstances? How can we make sense of all the good advice—such as, count your blessings, don't cry over spilled milk—that people have on offer? Coping is a perfect companion text for a moral psychology course, a resilience course, or part of an ethics course. The material is written for readers who are new to philosophy and progresses in short self-contained sections. It draws on literature, music, podcasts, and news items. Each chapter has questions for discussion or essay writing and suggestions for material to explore the topic further.

*Paddy's Lament, Ireland 1846-1847* Thomas Gallagher,1987 Ireland in the mid-1800s was primarily a population of

peasants, forced to live on a single, moderately nutritious crop: potatoes. Suddenly, in 1846, an unknown and uncontrollable disease turned the potato crop to inedible slime, and all Ireland was threatened. Index.

*Folk Women and Indirection in Morrison, Ní Dhuibhne, Hurston, and Lavin* Jacqueline Fulmer,2007 Focusing on the lineage of pivotal African American and Irish women writers, Jaqueline Fulmer argues that these authors often employ strategies of indirection, by way of expressions of folklore, when exploring unpopular topics, to attract readers who would otherwise reject the subject matter.

*The House of the Wolfings (Foundations of Modern Fantasy Edition)* William Morris,2015-03-27 FROM THE FATHER OF MODERN FANTASY THAT INSPIRED TOLKIEN AND LEWIS. Warriors, dwarves, gods, epic battles, magic armor, and a ring. If this all sounds a familiar, it's for good reason. In *The House of the Wolfings*, the first of the author's many great fantastic romances, William Morris weaves the traditional with the supernatural, and establishes a precursor to the modern epic fantasy genre. Based on a translation of an old Norse saga, Morris reconstructs a portrait of the lives of the Germanic Gothic Tribes galvanized into action against the attacks of imperial Rome. Thiodolf, the leader of the Wolfings, is one of two men chosen as War-Dukes to lead the tribes against their enemies. Thiodolf may be supported by his lover the Wood-Sun and their daughter the Hall-Sun (both of whom are related to the gods), but he also possesses a dwarf-made mail-shirt that, unbeknownst to him, bears a curse.

**The Burning Of Bridget Cleary** Angela Bourke,2010-12-15 In 1895 twenty-six-year-old Bridget Cleary disappeared from her house in rural Tipperary. At first, some said that the fairies had taken her into their stronghold in a nearby hill, from where she would emerge, riding a white horse. But then her badly burned body was found in a shallow grave. Her husband, father, aunt and four cousins were arrested and charged, while newspapers in nearby Clonmel, and then in Dublin, Cork, London and further afield attempted to make sense of what had happened. In this lurid and fascinating episode, set in the last decade of the nineteenth century, we witness the collision of town and country, of storytelling and science, of old and new. The torture and burning of Bridget Cleary caused a sensation in 1895 which continues to reverberate more than a hundred years later. Winner of the Irish Times Prize for Non-Fiction

On Writing Well William Knowlton Zinsser,1994 Warns against common errors in structure, style, and diction, and explains the fundamentals of conducting interviews and writing travel, scientific, sports, critical, and humorous articles.

*The High Commissioners* Carl Bridge, Frank Bongiorno, David Lee,2010-01-01 Marks the centenary of the posting of the first Australian High Commissioner in London, so beginning what is today Australia's oldest diplomatic mission. In 1910, when Sir George Reid was appointed its first High Commissioner in London, Australia was a self-governing but not yet

sovereign state and the Australian Governor-General remained the most important channel of communication between the Australian and United Kingdom governments until the late 1920s. The book traces the history of the office and in doing so illuminates the larger story of Australian-United Kingdom relations in the twentieth century, the evolution of Australia from British colony to sovereign state and the gradual transition of the United Kingdom from head of an empire to member of the European Union.

**Genius at Play** Siobhan Roberts,2024-10-29 A multifaceted biography of a brilliant mathematician and iconoclast A mathematician unlike any other, John Horton Conway (1937–2020) possessed a rock star’s charisma, a polymath’s promiscuous curiosity, and a sly sense of humor. Conway found fame as a barefoot professor at Cambridge, where he discovered the Conway groups in mathematical symmetry and the aptly named surreal numbers. He also invented the cult classic Game of Life, a cellular automaton that demonstrates how simplicity generates complexity—and provides an analogy for mathematics and the entire universe. Moving to Princeton in 1987, Conway used ropes, dice, pennies, coat hangers, and the occasional Slinky to illustrate his winning imagination and share his nerdish delights. *Genius at Play* tells the story of this ambassador-at-large for the beauties and joys of mathematics, lays bare Conway’s personal and professional idiosyncrasies, and offers an intimate look into the mind of one of the twentieth century’s most endearing and original intellectuals.

**Exit Laughing** Irvin S. Cobb,2013-10 This is a new release of the original 1941 edition.

**The White Goddess** Robert Graves,1966-01-01 *The White Goddess* is perhaps the finest of Robert Graves's works on the psychological and mythological sources of poetry. In this tapestry of poetic and religious scholarship, Graves explores the stories behind the earliest of European deities—the White Goddess of Birth, Love, and Death—who was worshipped under countless titles. He also uncovers the obscure and mysterious power of pure poetry and its peculiar and mythic language.

**The Secret Lives of Objects** Lisa Godson,2016-06-03 A fascinating exploration of the hidden histories behind everyday objects, produced in collaboration with NCAD, ID2015 and the Little Museum of Dublin.

Tales from the Time Loop David Icke,2003 *Tales from the Time Loop* is the most comprehensive book yet written about

the global conspiracy that emerges more clearly every day. David Icke has been warning for well over a decade of the plan for a world fascist state, a global version of Nazi Germany, in which the people will be prisoners of a Big Brother dictatorship founded on the suppression of the most fundamental freedoms and total control and surveillance. Today there is a gathering awareness that he was right. People are realising that Big Brother is no longer coming. He's here.
