Intellectual Property and Competitive Strategies in the 21st Century Shahid Alikhan, R. A. Mashelkar, 2009-01-01

It is scarcely five years since the first edition of this book, a milestone in the strategy-oriented approach to intellectual property at the global level, appeared and was quickly and widely welcomed as virtually an intellectual property agenda for the 21st century. This second edition includes a judicious update of the original data and analysis in light of the significant movement forward that has taken place over the past few years in many of the critical areas that shape the competitive strategies in the use of IP Rights. The authors have lost none of their conviction of the necessity to enhance awareness of the techno-economic effects of intellectual property rights protection on enterprise competitiveness and national growth and development. The book provides a panoramic but detailed view of the world's intellectual property system that embraces socioeconomic, cultural and technological development in its scope, clarifying the pitfalls and challenges that the system presents even as it promises to improve the quality of life on our planet. The authors both internationally respected and honoured for their work in elucidating the economic necessity of an intellectual property system that can inspire universal confidence, emphasize the imperative of international competitiveness in knowledge-based technology. In their orderly presentation of the key issues that promote the real benefits (not yet achieved) of a truly effective regime of intellectual property rights they discuss such factors as the following: the use of intellectual property as an integral part of business strategy; optimal utilization of intellectual property assets; the incentives and rewards of and "fair play" in the marketplace; facilitation of widespread diffusion and adoption of the fruits of creativity and innovation; the crucial role of small and medium enterprises; the need at every level for deliberate incentive policies that encourage creativity and invention; strict enforcement of intellectual property rights; creating linkages between intellectual property stakeholders; and use of patent information for forecasting technology trends. These issues and recommendations and more are all discussed in a framework that highlights each of the major areas of knowledge in which intellectual property rights are most insistently invoked today, such as the digital economy, e-commerce, Internet domain names, database protection, protection of plant varieties, design of integrated circuits, biotechnology, and nanotechnology. Ultimately, however, this outstanding work's most important contribution lies in its vision of the organic corporation of governments, institutions, supranational organizations, multinational corporations, small and medium enterprises, and civil society as they collectively

fashion a 21st century in which creativity and innovation are enabled to convert knowledge into wealth and social good. For this reason, as well as for its richly detailed treatment of trends and current reality in the field, this new, updated edition of *Intellectual Property and Competitive Strategies in the 21st Century* will continue to be read and put to good use by business people, international lawyers, government officials, and interested academics in all parts of the world.

Pharmaceutical Competitive Intelligence for the Regulatory Affairs Professional Raymond A. Huml, 2012-06-15 This Brief defines competitive intelligence (CI) as a tool for making investment decisions within the pharmaceutical industry. It provides an overview of processes that the regulatory affairs professional must take into account when evaluating data impacting product-based risk evaluations. These apply particularly to evaluations that focus on outputs such as regulatory approval, or the commercial impact of product labeling on the sales forecast over a limited timeframe. The Brief also provides an overview of intellectual property assessment that can impact a product's lifespan on the market due to patent protection itself (or loss of patent protection) or via regulatory exclusivity. Case examples are discussed to illustrate the importance of keeping up with the ever-changing regulations, and how to interpret them in the context of CI. In addition, there is a section on virtual data rooms (VDRs) which currently function as the cornerstone of due diligence investigations. While aimed primarily at regulatory affairs professionals in the United States, this publication provides a useful adjunct for other pharmaceutical executives, especially those new to product-based investments, and regulatory affairs professionals in other regions.

Competitive Intelligence C. West, 2001-09-19 To beat your competitors you must know exactly what they are doing. It is impossible to put together a successful competitive strategy if you are unsure what your competitors are doing, what they plan to do or even who your competitors really are. As markets evolve even more rapidly and companies adapt their plans much faster, the demand for competitive intelligence has spiralled. Christopher West, an expert in the field, shows you how

to collect, analyse and use competitive intelligence from a variety of sources, including the internet, and change your competitive strategy accordingly.

Competitive Intelligence and Decision Problems Amos David,2013-01-09 The development of a research, teaching, or application of competitive (economic) intelligence requires a strategic and transverse vision in regards to related issues. The authors of this book, members of an expert group supported by the CNRS in France, bring all of their talents together to create a comprehensive book that does just this and more.

The Internet Age of Competitive Intelligence John J. McGonagle,Carolyn M. Vella,1999-01-30 Two of the most prolific and challenging authorities on the topic of competitive intelligence (CI) reflect on and respond to the changes in the field over the last decade. The authors point out that CI users have to change what they are doing, show why they are doing it, and provide ways of doing it. Their book reviews the problems in the development of CI since the 1980s, discusses the impact of the Internet and the rise in use of other secondary sources, and draws from and provides access to the growing body of CI information, knowledge, and literature. Combining a scholarly approach with hands-on advice, McGonagle and Vella have written the first work to guide CI professionals through the emerging literature of their field. Among the important changes in the field the authors cover are: the radical changes in on line database searching and ways in which the Internet has fundamentally modified how we think of accessing data. Their book explores and reports the major body of work from the Society of Competitive Intelligence Professionals, now that more businesses worldwide are using competitive intelligence and either writing about their experiences with it, or joining in new benchmarking studies. The result is newer information on what really works, what doesn't work, and who is doing what with it. The book is thus a starting point for people new to the field of CI as well as a resource to help experienced professionals do their jobs better.

Competitive Intelligence as a Sustainable Long Term Competitive Advantage Lucretia Löscher, 2011-01-03
Diploma Thesis from the year 2010 in the subject Business economics - General, grade: 1,7, HHL Leipzig Graduate School of Management, language: English, abstract: "Integrity without knowledge is weak and useless, and knowledge without integrity is dangerous and dreadful." Samuel Johnson (1709 - 1784) Nowadays knowledge is the economic basis of each company. One needs to know the product, the technology behind it, but also the customer, the competitor and other circumstances that influence the business . The scientific term for the necessity of information gathering and its transformation into applicable knowledge is Competitive Intelligence (CI). This thesis focuses on three questions regarding CI which are linked in a model. Firstly it gives an overview about the most important types of CI. Based on three types, namely Market Intelligence, Competitor Intelligence and Internal Intelligence, it raises the question if there are industry-specific requirements and general key aspects of the activity. The focus group consists of 15 multinational companies from 6 different industries which were analysed with respect to information gathering and types of CI activities. Secondly the thesis considers legal aspects. It asks how effective international treaties and European laws are in terms of criminal prosecution of unfair competition and protection of intellectual property rights. The considerations are limited to those facts that might be taken into account for CI actions. In addition it analyzes if the results from the first part of the thesis are legally allowed or if some activities are legally questionable. Thirdly it looks at the strategic relevance of the legally gathered information. Therefore it assesses the opportunities of CI activities for strategic implementation based on the existing strategic tool "Scenario Planning" and proves that the fit of CI and Scenario Planning has potential to create a sustainable Competitive Advantage (CA).
