Some New World Peter Harrison,2024-04-18 In his famous argument against miracles, David Hume gets to the heart of the modern problem of supernatural belief. 'We are apt', says Hume, 'to imagine ourselves transported into some new world; where the whole form of nature is disjointed, and every element performs its operation in a different manner, from what it does at present.' This encapsulates, observes Peter Harrison, the disjuncture between contemporary Western culture and medieval societies. In the Middle Ages, people saw the hand of God at work everywhere. Indeed, many suppose that 'belief in the supernatural' is likewise fundamental nowadays to religious commitment. But dichotomising between 'naturalism' and 'supernaturalism' is actually a relatively recent phenomenon, just as the notion of 'belief' emerged historically late. In this masterful contribution to intellectual history, the author overturns crucial misconceptions - 'myths' - about secular modernity, challenging common misunderstandings of the past even as he reinvigorates religious thinking in the present.

The Routledge History of Happiness Katie Barclay, Darrin McMahon, Peter N. Stearns, 2024-05-09 Unmatched in originality, breadth, and scope, *The Routledge History of Happiness* features chapters that explore the history, anthropology, and psychology of happiness across the globe. Through a chronological approach that ranges from the Classical and Postclassical to the twenty-first century, this volume balances intellectual-history treatments and wider efforts to deal with relevant popular culture and experience, including consumerism. It explores how and why the history of happiness has emerged in recent decades, as well as psychological and social science approaches to happiness, with a history of how

relevant psychological research has unfolded. Chapters examine early cultural traditions concerning happiness, including material on Buddhist and Chinese traditions, and how they continue to influence ideas about happiness in the present day. Overall, each section emphasises wide geographical coverage, with particular attention paid to East Asia, Latin America, Europe, Russia, and Africa. The Routledge History of Happiness is of great use to all undergraduates, postgraduates, and scholars interested in the global history of emotions.

Teaching Recent Global History Diana B. Turk, Laura J. Dull, Robert Cohen, Michael R. Stoll, 2014-03-05 *Teaching Recent Global History* explores innovative ways to teach world history, beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: • An overarching narrative that helps readers address historical arguments; • Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them; • Lesson plans suitable for both middle and secondary level classrooms; • Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

The Oxford Handbook of the History of Education John L. Circulation of Knowledge Johan Östling, Erling Sandmo, David Larsson Heidenblad, Anna Nilsson Hammar, Kari Hernæs Nordberg, 2018-01-01 Historians have long been interested in knowledge—its nature and origin, and the circumstances under which it was created—but it has only been in recent years that the history of knowledge has emerged as an academic field in its own right. In *Circulation of Knowledge*, a group of Nordic scholars explore a range of theoretical and methodological approaches to this new and exciting area of historical research. The question of knowledge in motion is central to their investigations, and especially how knowledge is transformed when it circulates between different societal arenas, literary genres, or forms of media. Reflecting on twelve empirical studies, from sixteenth-century cartography to sexology in the

1970s, the authors make a significant contribution to the growing international research on the history of knowledge.

The Mathematical Mind of F. M. Dostoevsky Michael Marsh-Soloway, 2024-12-16 The Mathematical Mind of F. M. Dostoevsky: Imaginary Numbers, Non-Euclidean Geometry, and Infinity reconstructs the curriculum and readings that F. M. Dostoevsky encountered during his studies and connects such sources to the mathematical references and themes in his published works. Prior to becoming a man of letters, Dostoevsky studied at the Main Engineering School in St. Petersburg from 1838 to 1843. After he was arrested, submitted to mock execution by firing squad, and sentenced to penal servitude in Siberia for his involvement in the revolutionary Petrashevsky Circle in 1849, most of his books and journals from the period of his education were confiscated, and destroyed by the Third Section of the Russian Secret Police. Although most scholars discount the legacy of his engineering studies, the literary aesthetics of his works communicate an acute awareness of mathematical principles and debates. This book unearths subtexts in works by Dostoevsky, communicating veins of mathematical thought that evolved throughout Classical Antiquity, the Renaissance, and the Scientific Revolution.
