Genealogy of the Descendants of John Eliot, "apostle to the Indians," 1598-1905 Wilimena Hannah Eliot Emerson, Ellsworth Eliot, George Edwin Eliot, 1905

Ancient Criminal Trials in Scotland Robert Pitcairn, 1833

Handbook of Separation Process Technology Ronald W. Rousseau, 1987-05-13 Surveys the selection, design, and operation of most of the industrially important separation processes. Discusses the underlying principles on which the processes are based, and provides illustrative examples of the use of the processes in a modern context. Features thorough treatment of newer separation processes based on membranes, adsorption, chromatography, ion exchange, and chemical complexation. Includes a review of historically important separation processes such as distillation, absorption, extraction,

leaching, and crystallization and considers these techniques in light of recent developments affecting them.

Gendered Choices Sue Jackson,Irene Malcolm,Kate Thomas,2011-03-02 This important book breaks new ground in addressing issues of gendered learning in different contexts across the (adult) life span at the start of the 21st century. Adult learning sits within a shifting landscape of educational policy, profoundly influenced by the skills agenda, by complex funding policies, new qualifications and the widening/narrowing participation debate. The book is unique in highlighting the centrality of gendered choices to these developments which shape participation in and experiences of lifelong learning. *Gendered Choices* critically examines the continued expansion of a skills-based approach in areas of lifelong learning, including career decisions, professional identities and informal networks. It explores key intersections of adult learning from a gender perspective: notably participation, workplace learning and informal pathways. Drawing on research from a range of contexts, *Gendered Choices* demonstrates that for women the public/private spaces of work and home are often conflated, although the gendering of 'choice' has largely been ignored by policy makers. The themes of the book bring together some of these critical issues, explored through the multiple and fractured identities which constitute gendered lives. The book addresses these in an international context, with contributions from Canada, Spain and Iran that provide a wider international perspective on shared issues.

Spectroscopy B. Straughan,2012-12-06 It is fifteen years since Walker and Straw wrote the first edition of 'Spectroscopy' and considerable developments have taken place during that time in all fields of this expanding subject. In atomic spectroscopy, for example, where the principles required in a student text have been laid down for many years, there have been advances in optical pumping and double resonance which cannot be neglected at undergraduate level. In addition, nuclear quadrupole resonance (n.q.f.) and far infrared spectroscopy now merit separate chapters while additional chapters dealing with Mossbauer spectroscopy, photoelectron spectroscopy and group theory are an essential requisite for any modern spectroscopy textbook. When the idea for a new edition of *Spectroscopy* was first discussed it quickly became clear that the task of revision would be an impossible one for two authors working alone. Consequently it was decided that the new edition be planned and co-ordinated by two editors who were to invite specialists, each of whom had experience of presenting their subject at an undergraduate level, to contribute a new chapter or to revise extensively an existing chapter. In this manner a proper perspective of each topic has been provided without any sacrifice of the essential character and unity of the first edition. The expansion of subject matter has necessitated the division of the complete work into three self contained

volumes. Volume I includes atomic, n.m.f., n.q.f., e.s.r. and Mössbauer spectroscopy.

Grassland Farming and Land Management Systems in Mountainous Regions European Grassland Federation. International Symposium, 2011 Mountainous regions, which cover nearly half of the continent's area, are in many ways of vital importance for the European population. They supply much of the continent's water, are centres of biological and cultural biodiversity, provide various opportunities for recreation/ farmers. But mountainous regions are characterised by permanent natural handicaps due to topographic and climatic restrictions on economic and agricultural activity. Because of the geographical constraints to farming, work productivity is on average lower by 28% in mountain areas compared with less favoured areas, and by 40% compared with lowlands. Agriculture in mountainous regions can therefore, in general, not compete with agriculture in advantaged lowlands and, with very few exceptions, cannot hope to become competitive in adopting intensive models in response to the growing global competition.

Ohio Practical Farmer, 1892

The Gentleman's Magazine Library George Laurence Gomme, 1891

The Book of Husbandry Anthony Fitzherbert, 2023-07-18 First published in 1534, this classic work on agriculture offers practical advice to farmers on various aspects of husbandry, including crop rotation, land management, and animal breeding. The author draws on his own experience as a landowner and justice of the peace to provide insights into the challenges facing rural communities of his time. A valuable resource for historians and agriculturalists alike. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it.
